Within-definition rank instability against its most strongly correlated feature (Klaeger, compounds with an active kinase, ranked among themselves)
S-score
r=-0.32, p<0.001
Entropy
r=-0.31, p<0.001
Gini
r=-0.25, p<0.001
Ratio
r=-0.28, p<0.001
Rank std
active-affinity range (pKd)
number of active kinases
number of active kinases
top1-top2 gap (pKd)
