Rank stability as a function of kinase panel size (50 subsamples per size)
Davis (68 cpd × 363 kin)
Klaeger (222 cpd × 217 kin)
Anastassiadis (178 cpd × 291 kin)
Metz (704 cpd × 172 kin)
Spearman with full panel
Panel size (number of kinases)
entropy (p*=50)
Gini (p*=110)
S-score (p*=50)
ratio (p*=350)
entropy (p*=80)
Gini (p*=200)
